

Green Story

Environmental impact and sustainability specifications of Brentano Green fabrics

PRODUCT: **Crescendo - 1933**

CONTENTS: 69% Bamboo Viscose, 31% Rayon

USAGE: Eco-fabric, Upholstery, Rapidly renewable, Degradable textile, LEED points possible, GOTS compliant

1. Bamboo is degradable, a rapidly renewable resource.
2. Harvesting bamboo has minimal impact on the surrounding environment.
 - A. Inherent insect-resistant properties eliminate the need for pesticides.
 - B. Its vast root network diminishes the need for replanting using diesel-emitting equipment to plant seeds and till soil.
3. Bamboo may help improve soil quality and rebuild eroded soil.
4. Bamboo grows without any artificial irrigation, and has the unique ability to conserve water.
5. Bamboo Viscose's ability to quickly absorb dyestuffs results in less water use in the dyeing process. The dyes used for **Crescendo** are GOTS compliant.
