

## Green Story

### Environmental impact and sustainability specifications of Brentano Green fabrics

**PRODUCT:** **Cavetto - 3959**

**CONTENTS:** 100% Polyurethane Face; 69% Polyester, 31% Polyurethane

**USAGE:** Leather alternative, Upholstery, Panel, Eco-fabric

1. Naturally soft and flexible, polyurethane does not require the solvents used to soften PVC or leather.
2. **Polyurethane faux leather** offers a greener alternative to vinyl (PVC). PVC contains chloride and is not degradable. It leaches toxic additives in landfills and emits carcinogenic dioxin when incinerated.
3. Polyurethane faux leather offers a greener alternative to leather. Leather production is a chemical-laden process, including the use of heavy metals.
4. General cleaning of polyurethane surfaces often requires only soap and water.
5. **Cavetto** is manufactured in facilities that are conscientious of the green movement. A variety of policies are in place, such as air and water pollution decrement systems, as well as reduction and reuse of solvents.
6. **Cavetto** is manufactured in an ISO 14001 certified facility. ISO 14001 creates an Environmental Management System (EMS) to identify and achieve environmental goals. *For more information, please visit [www.iso.org](http://www.iso.org)*
7. All pigments and chemicals used in the facilities comply with EPA guidelines.
