Green Story
Environmental impact and sustainability specifications of Brentano Green fabrics

PRODUCT: **Nomad - 4430**

CONTENTS: 80% Wool, 20% Nylon

USAGE: Eco-fabric, Upholstery, Panel, Drapery, Rapidly renewable, LEED points possible

1. The environmental focus of the Back to Basics collection is water usage. **Nomad** qualifies for the Brentano Green label because of the attention paid to water conservation throughout the manufacturing process.

2. A fiber-dyed product, **Nomad** used only 30% of the energy and water that would be required for piece-dyeing.

3. The mill that produces **Nomad** has its own water treatment system so that the water it uses can be recycled. Ultimately, the water that returns to the public domain is cleaner than when it is removed.

4. **Nomad** uses none of the EPA Chemicals of Concern or materials on the Living Building Challenge red list.

5. **Nomad** is produced in a socially responsible facility that has adopted OHSAS 18001 as a way to promote a safe and healthy work environment.
