

Green Story

Environmental impact and sustainability specifications of Brentano Green fabrics

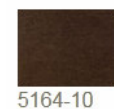

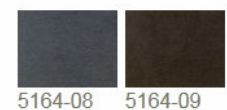

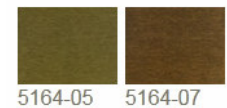

PRODUCT: **Imagine - 5164**

CONTENTS: 100% Organic Cotton

USAGE: Eco-fabric, Upholstery, Rapidly renewable, Degradable, LEED points possible.

1. Organic cotton is a biodegradable, rapidly renewable resource.
2. Organic cotton reduces the overall exposure to toxic chemicals from synthetic pesticides that pollute the ground, air, water, and food supply and are associated with a range of health consequences.
3. Organic cotton offers an alternative to the problems related to conventional cotton, such as salinization (too much salt in the soil), desertification (overexploitation of vegetation causing depletion of plant life), and poisoning of the environment and human health.
4. **Imagine** is manufactured using 100% wind power.
