

Green Story:

Environmental impact and sustainability specifications of Brentano Green fabrics

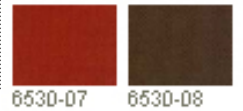

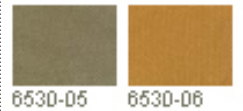

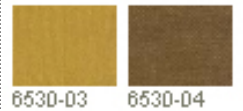

Product Name: **Second Chance- 6530**

Contents: 43% Recycled Polyester, 56% Rayon, 1% Nylon

Usage: Eco-fabric, Recycled content, Upholstery, Drapery, Panel, LEED points possible

- 1) **Second Chance** is manufactured using 43% post industrial recycled polyester, which means the manufacturer gathers excess fabric and reuses it.
- 2) Using recycled polyester fibers preserves virgin oil needed to manufacture new polyester fibers.
- 3) The dyestuffs of the recycled polyester are tested to ensure there are no harmful chemicals or heavy metals present.
- 4) The fabrics are tested for air-emissions to certify there are no compounds deemed unsafe by MBDC standards.
- 5) All finishing chemicals are tested for human safety.
- 6) **Second Chance** is manufactured in an environmentally conscious facility that reduces and reuses water as well as energy, and also recycles everything from machine oils to office paper and bottles.
- 7) **Second Chance** can continue to be recycled, preventing it from ever reaching a landfill.
