

Environmentally Friendly Textiles by BRENTANO, Inc.

Green Story

Environmental impact and sustainability specifications of Brentano Green fabrics

PRODUCT: **Fontaine 4585**

CONTENTS: 42% Post-Consumer Recycled Polyester, 32% Solution-Dyed Nylon, 26% Cotton

USAGE: Eco-fabric, Upholstery, LEED Points Possible

1. Fontaine is made from 42% post-consumer recycled polyester product. Post-consumer waste is recovered from a material or finished product from the consumer supply chain (primarily from beverage bottles) that has served its intended use and has been discarded for disposal. The products are then recycled, ground and processed as a polyester fiber which is used in textiles. Using recycled fibers preserves the resources needed to manufacture new fibers and reduces waste destined for landfills.
2. The mill that manufactures Fontaine has environmentally conscious practices in place, including an initiative to reuse all selvage waste by donating it to the Amish community to be woven into rugs. Fontaine is made with no known toxins or hazardous components.
3. There is no off gassing in the process of yarn manufacturing, yarn dyeing, weaving or finish.
