## Brentano Introduces Traveler Collection for Spring 2020

An expansive palette, with an abundance of saturated colors, rounds out a truly sophisticated yet versatile collection.

**Wheeling, IL. (March 2020)**— Drawing inspiration from our team's world travels, the Spring 2020 introduction from Brentano embodies the emboldened spirit of distant lands and the sense of adventure they evoke. Echoing Founder and Design Director, Iris Wang's love for exploration, the 15 new introductions from the Traveler Collection are each informed by our design team's interactions with talented artisans from across the globe. These erudite woven wonders feature a combination of unique and arresting designs, that continue to highlight Brentano's commitment to Beauty + Performance.

Showcasing the talents of Brentano's creative young designers, the Traveler Collection features whimsical draperies, sumptuous, inspired pattern work and fundamental textures for everyday use. The intricate designs and jewel-toned palette creates an intimate, color focused journey, reflective of our interactions and experiences with some of the most storied and enchanting places from around the world.

Two stunning in-house fabric designs take center stage in this diverse and adventurous collection of patterns inspired by our world travels. **Dorado** is a captivating upholstery fabric that plays with shifting shades of color to create multi-faceted, dimensional layers. Dorado's beauty is emphasized by its 8 rich and opulent colorways, and its appeal is further enhanced by Dorado's superior durability and easy-care Tri-sistant finish.

The second, equally as stunning addition, **Olympia**, draws inspiration from the sinuous beauty of Malachite. An exceptional upholstery fabric, Olympia features an artistic interpretation of the natural, flowing lines of this rare stone, and uses them to create a bold, space-defining graphic fabric. This refined and luxurious textile comes in 7 mesmerizing, monochromatic colorways, each skillfully highlighting the captivating tonal movement within this tessellated pattern.
