

Environmentally Friendly Textiles by BRENTANO, Inc.

Green Story

Environmental impact and sustainability specifications of Brentano Green fabrics

PRODUCT: **Clockwork 9651**

CONTENTS: 50% Acrylic, 25% Wool, 25% Polyester
(75% Recycled Content)

USAGE: Eco-fabric, Upholstery, Residential Drapery, Reversible

1. Clockwork is made from 45% post-consumer recycled content. Post-consumer waste is recovered from a material or finished product from the consumer supply chain (primarily from used textiles) that has served its intended use and has been discarded for disposal. Using recycled fibers preserves the resources needed to manufacture new fibers and reduces waste destined for landfills.
2. Clockwork is made from 30% post-industrial recycled content. Post-industrial waste is recovered from the production process at spinning mills that has been discarded for disposal.
3. The mill that manufactures Clockwork has environmentally conscious practices in place, including a waste reclamation process. Additionally, the manufacturing process conserves energy by using 40% solar power as an alternative energy source.
4. The overall contents of Clockwork includes 25% wool. Wool is a biodegradable, rapidly renewable resource.
5. Recycled yarns are dyed in a yarn dyeing facility which conserves the use of water and other chemical substances.
