

Environmentally Friendly Textiles by BRENTANO, Inc.

Green Story

Environmental impact and sustainability specifications of Brentano Green fabrics

PRODUCT: **Renata 6571**

CONTENTS: 61% Polyester, 39% Post-Consumer Recycled Polyester
(Made with SEAQUAL® YARN)

USAGE: Eco-fabric, Upholstery

1. Renata is made from 39% post-consumer recycled polyester content. Post-consumer waste is recovered from a material or finished product from the consumer supply chain that has served its intended use and has been discarded for disposal. Using recycled fibers preserves the resources needed to manufacture new fibers and reduces waste destined for landfills.
2. The mill that manufactures Renata has environmentally conscious practices in place, including renewable energy resources used during the manufacturing process.
3. Woven from 61% polyester and 39% post-consumer recycled polyester from SEAQUAL® YARN, Renata is an environmentally conscious product working to solve issues with an abundance of marine litter. SEAQUAL® YARN contains 10% Upcycled Marine Plastic and 90% post-consumer plastic from land sources. By using SEAQUAL® YARN, Brentano joins the SEAQUAL® INITIATIVE to raise awareness of the problem of marine litter and the organizations working to clean our oceans.
4. Renata is made with no known toxins or hazardous components.
